Statement of Editorial Policy

The International Journal of Case Method Research and Application (IJCRA) solicits and welcomes research across the entire range of topics encompassing the domain of case method research and application and interactive teaching methodologies. The journal's scope includes case writing and interactive teaching and learning, continuing and distance education that cross national, cultural and disciplinary boundaries.

IJCRA welcomes theoretical and empirical papers that advance social scientific research on teaching and learning. The International Journal of Case Method Research and Application is a methodologically pluralistic journal. Conceptual and theory-development papers, empirical hypothesis-testing papers, mathematical modeling papers and case studies are especially welcome. IJCRA has special interest in research addressing important issues that transcend the boundaries of single academic disciplines and corporate managerial functions. Therefore, IJCRA welcomes interdisciplinary scholarship and commentaries that challenge the paradigms and assumptions of single disciplines or functions. IJCRA solicits and accepts manuscripts on teaching materials and methods. Experimental, developmental work and book reviews will also be considered.
